PROFESSIONAL SUMMARY

A passionate and self-driven **Full Stack Developer** and **AWS Cloud Practitioner** with 2+ years' experience in **responsive web development**, **cloud technologies**, and **full-stack applications**. Skilled in building scalable, user-focused solutions using modern JavaScript frameworks. Experienced in collaborating in cross functional teams and continuously learning new technologies to solve real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Front-end development: HTML, CSS, Tailwind CSS, Bootstrap, React, Next.js

Framework: React, Next.js

Database: MySQL, MongoDB

Back-end: Express, NodeJS, Typescript

Tools: Figma, Git, GitHub, Postman, Vite, Linux

Cloud: AWS (EC2, S3, Lambda)

EXPERIENCE

Front-End Developer | Aquila Cyber Jan 2025 – Present

- Translated Figma designs into responsive Next.js pages using Tailwind CSS, ensuring consistent UI/UX across desktop and mobile for real-time threat monitoring.
- Collaborated with backend engineers to integrate RESTful APIs and WebSocket connections, enabling live data streaming and real-time dashboard updates.
- Implemented code-splitting and lazy loading using Next.js dynamic imports, reducing initial load times by 40% and improving performance on slower networks.

- Built reusable UI components and layout patterns, improving development efficiency and maintaining design consistency across the app.
- Participated in code reviews and followed best practices, improving code quality and maintainability.
- Monitored performance using browser dev tools and optimized rendering, reducing UI lag during high-frequency updates.

PROJECTS

Fish Marketing Cooperative System (Full-Stack WebApp) | fishmarke.netlify.app

May 2025 – August 2025

- Developed a MERN stack application (MongoDB, Express, React, Node.js) that automated inventory management, sales tracking, and financial reporting, reducing manual record-keeping by 80%.
- Implemented secure user authentication and RESTful APIs, improving data accuracy by approximately 60% and enhancing overall system reliability.
- Optimized asynchronous data handling and frontend rendering using async/await, loading states, and conditional rendering, improving page load performance by 40%.
- Introduced pagination and backend data filtering, reducing API response payloads and improving dashboard responsiveness by 35%.
- Conducted testing, debugging, and validation of data flows, reducing runtime errors and data-entry issues by approximately 25%.
- Designed a responsive UI using React and Tailwind CSS, improving usability across devices and increasing user adoption and engagement by about 50%.

EDUCATION

Business and Information Technology | Kabarak University 2021 - 2025

Certifications

Full-Stack MERN Development | Power Learn Project Africa Feb 2025 to July 2025

AWS Cloud Practitioner Issued Date Dec 2025
